

WHAT TO EXPECT...After your Hemorrhoid Ligation

Ryan D. Edwards, M.D. ❖ Katherine A. Petrin, M.D. ❖ Sara K. Herrera, M.D.

Gregory J. McBride, D.O. ❖ Laura R. Lozier, M.D.

- 1) You will experience a pressure or full feeling. You may feel an urge to have a bowel movement. **DO NOT** strain or force yourself. Plan on resting the remainder of the day.

- 2) You may have slight bleeding. **THIS IS NORMAL**. If you have excessive bleeding, please call our office Mon-Thurs 8-5, Fri-8-4 or UPHS Marquette for after hours and weekends and **ASK FOR THE GENERAL SURGEON ON-CALL**. (Phone #'s listed below).

- 3) Sitz baths may be helpful to relieve discomfort and over the counter pain relievers such as Motrin or Tylenol.

- 4) In 5-10 days you may experience slight bleeding when the bands fall off. You may notice a small, black rubber band in your stool or in the toilet bowl. Don't be alarmed.

- 5) If you have any problems or questions, please call our office at the phone numbers listed below

- 6) *Make sure that you understand all instructions before leaving the surgery area.*

Contact information:

Monday-Thursday 8-5 pm, Friday 8-4 pm, you can call Surgical Associates of Marquette at (906) 225-3853. *After 5 p.m. and on weekends* call (906) 449-3000 UP Health System - Marquette and the switchboard operator will put you in touch with the General Surgeon on call.
